

Please preserve the what is left of the diversity of our press by voting in the public interest to curtail the ownership of media outlets by huge conglomerates. The FCC was established to protect the interests of the public who are supposed to own the public airways, but broadcasters no longer have to answer to the public or the FCC for serving the public good. DO NOT increase their ability to make money by removing our rights as citizens to diversity. At the very least, the citizens should have a voice in this decision. Let the public be heard and let the deals be made in the open in the light where all can see where the money is flowing.

Thank you for listening.
